About The Virden Series

The BLV is a series of LED linear vapour proof fixtures designed for surface and suspended mounting. It is well suited for indoor or outdoor use where there is a high probability of moisture and exposure to dust. Its unique, IP67 certified body makes it ideal in environments where vapour proof efficiency and performance are a factor. The fixtures are rated for standard operation at temperatures as low as -30°C. For environments requiring even more extreme conditions, an optional upgrade rated for -40°C is available.
